

Streaming Handover

Equipment Needed:

- elgato capture card (owned by the club – in cabinet)
- Camera – GoPro or any camera that can be plugged into mains is recommended for long streams like roleplay or life
- HDMI cable or whatever plugs into your camera (the capture card has a HDMI input)
- Tripod and means to mount your camera if it doesn't have standard tripod mount threading
- Microphone
- Laptop with streaming software – OBS is free and functional

Set Up:

Get equipment in the day before for Tech test – gives you a chance to replace anything broken or missing as well as figure out the best settings

Have a wheel member from UCC activate Ethernet port (its either 8, 9, or 11) and have the laptop running OBS connect to it

OBS:

- Add a scene
- Add sources;
 - Camera – through the capture card
 - Mic
 - Overlay
- Connect OBS to twitch (Unigames already has a twitch account called roleplay4lyf)
- account with the account's stream key
- Hit the start streaming

- Watch the frame rate and stream health in the bottom right corner, if its having issues you may have to change the bit rate to match twitch's

Advertise, set up and do the thing [thumbs up emoji]
